HOSPITALITY REFURBISHMENT · BARCELONA

BamBam Les Corts
From a classic kitchen to a modern restaurant

From the Glòries branch to Les Corts, with decommissioning, asset recovery and complete fit out.

The transformed Les Corts dining and service space.

The challenge

BamBam was relocating from its Glòries branch to Les Corts. The new premises housed a classic restaurant and needed to become a modern BamBam space. The challenge was to recover useful assets at Glòries and prepare Les Corts for the move.

What we did

We decommissioned the Glòries branch, protected and packed reusable assets, then refurbished and fitted out Les Corts. Equipment assembly, service connections, interior adaptations and decorative finishes were coordinated through a clear point of contact.

The result

The classic restaurant at Les Corts became a modern kitchen, service area and dining space ready for BamBam to move in. Reusing serviceable assets recovered from Glòries helped save money and preserve the customer's existing investment.

CASE STUDY

GLÒRIES · DECOMMISSIONING

Recovering value before the move

Careful dismantling protected the assets that could serve the customer again.

We dismantled the kitchen and customer area at BamBam's Glòries branch with reuse in mind. Appliances, screens, furniture and decorative elements were separated, handled and protected for the next stage. This preserved useful assets and helped avoid replacement spending caused by damage during removal.

Glòries kitchen before dismantling.

Glòries counter and menu display setup.

Equipment protected and staged for handling.

Kitchen line cleared during dismantling.

CASE STUDY

GLÒRIES · RECOVERY AND LOGISTICS

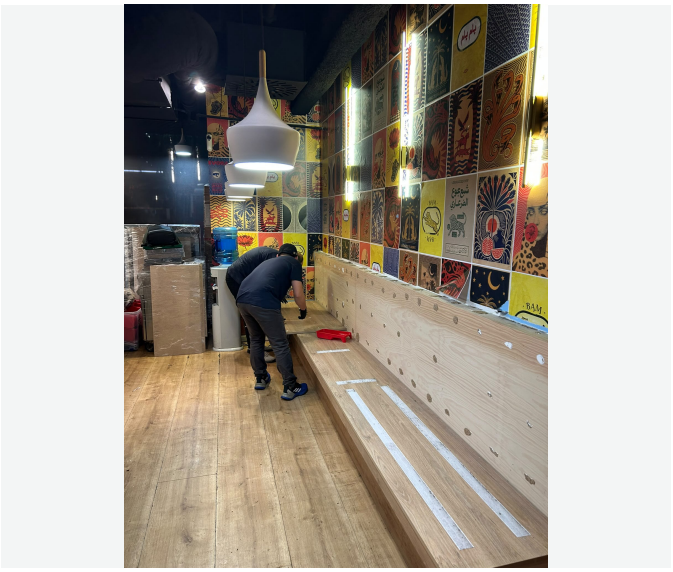

Preparing assets for a new setting

Protection, packing and organised clearance connected removal with installation.

At Glòries, we recovered reusable fittings and decorative elements, dismantled seating and prepared equipment for relocation to Les Corts. Grouping and protecting the assets made them easier to handle and reinstall. Preserving the customer's existing investment was central to the process.

Kitchen fittings removed for handling.

Fixed seating carefully dismantled.

Wrapped equipment prepared for transport.

Glòries dining floor after clearance.

LES CORTS · REFURBISHMENT AND FIT OUT

Bringing the new premises together

Equipment installation and interior works coordinated around the restaurant layout.

At Les Corts, we converted the existing classic restaurant into a modern space for BamBam, assembling equipment and carrying out supporting installation and building works. The programme brought together kitchen services, counter adaptations, wall preparation and finishes, lighting and digital service equipment. Coordinating these interfaces reduced the customer's burden of managing separate stages and helped limit avoidable rework.

Les Corts frontage during preparation.

Equipment and counter installation in progress.

Upper enclosure panels being fitted.

Counter enclosure ready for finishing.

Modern kitchen and counter with equipment and digital devices in place.

PROJECT OUTCOME · CUSTOMER VALUE

Modernisation with reuse at its core

A complete transformation that made practical use of what the customer already owned.

Modern kitchen line with extraction and digital screens.

Service counter with glass storage and pendant lighting.

BamBam dining area with refreshed finishes, seating and lighting.

How we helped the customer save

Recovering and reinstalling serviceable assets reduced the need for new purchases. Careful dismantling protected equipment and decorative features, while coordinated installation helped avoid duplicated effort and unnecessary changes.

A complete service

We carried the project from decommissioning BamBam's Glòries branch to transforming the classic restaurant at Les Corts. The customer gained a modern kitchen and dining environment prepared for the move, with continuity across the relocation and refurbishment.
